

# PROJECT PROFILE

## Nyloplast Inline Drains

Cincinnati Premium Outlets, Cincinnati, OH

### ENGINEER

Kleingers & Assoc.

### CONTRACTOR

Welsh Excavating

### PROJECT DESCRIPTION

This was a large site project for the purpose of building an outlet mall in the outskirts of Cincinnati. The plans called for over 300 Nyloplast Inline Drains with standard and pedestrian hinged style grates in and around the immediate buildings to provide drainage for the immediate buildings of the stores located in the outlet mall.

### PROJECT HIGHLIGHTS

Nyloplast Inline Drains are lightweight, watertight, easy to use, and can withstand H-20 & H-10 loading. The plans called for a large amount of straight away drainage along the immediate paved areas. The 12" Inline Drains were able to provide drainage around the buildings in a paved area without having to use large unsightly castings. In conjunction with Nyloplast Inline Drains, ADS N-12 is also lightweight and doesn't require heavy machinery to lift. The small nature of the 12" Inline Drains and the 12" ADS N-12 pipe enabled the contractor to fit these drains in tight spaces.

### ADS PRODUCTS USED

The city used ADS N-12 pipe and Nyloplast Drainage Structures with both 2x2 Road and Highway as well as standard and pedestrian castings for drainage.
